

Blackwell Forest Preserve West Branch DuPage River Trail Closure

The Forest Preserve District is building a new campus for our grounds and natural resources crews here at Blackwell.

The project requires a new water main under the West Branch DuPage River Trail along McKee Marsh. As a result, a section of the trail (highlighted on the map in yellow) will temporarily close.

When work begins we'll post detour signs at key intersections to help you avoid the closed section as you walk, bike, or ride horseback between Gary's Mill Road, the McKee Marsh parking lot, and the Mack Road trail crossing.

For details, including updates on when the trail is expected to reopen, visit dupageforest.org, scan the QR code, or follow us at facebook.com/DuPageForest.

Scan to read how the new grounds and natural resources campus will strengthen Forest Preserve District efforts to improve and maintain natural areas, trails, streams, and roads and will update worksite conditions for our crews.
