

York Woods Forest Preserve

North York Road/Harger Road Intersection Improvement

June – December 2020

Starting June 1 Oak Brook will begin work to improve the intersection of York and Harger roads. The construction area is highlighted in yellow.

When completed, the project will eliminate the need to use the Roosevelt Road interchange to access Harger Road from northbound York Road.

It will also make it easier and safer to access York Woods Forest Preserve via the Salt Creek Greenway trail by creating a new trail underpass.

The Harger Road parking lot will remain open, but sections of the Salt Creek Greenway Trail may periodically close. Detour signs will offer alternative routes.

Please be careful near the construction area, and follow all signs and workers' instructions. For updates, visit dupageforest.org.
