Mussel Rearing at the Urban Stream Research Center

Gravid female plain pocketbook, Lampsilis cardium, displaying lure.

Fluted-shell, Lasmigona costata, glochidia larva (white specs) attached to gill tissue of a host fish creek chub (Semotilus atromaculatus).

Mussel Bucket System

Juvenile plain pocketbook, Lampsilis cardium, in a bucket system chamber.

Pan System

Sub-adult plain pocketbook, Lampsilis cardium, in pan.

Growout system

 $\label{lem:condition} \textbf{Sub-adult plain pocketbook}, \textit{Lampsilis cardium}, \textbf{in growout system}.$

Trough system

 $\label{thm:local_state} \mbox{Juvenile flutedshell}, \mbox{\it Lasmigona~costata}, \mbox{from trough}.$

Hruska Boxes

 $\label{thm:complex} \mbox{ Juvenile white heel splitter}, \mbox{ $Lasmigona\ complanata}, \mbox{ raised in Hruska\ Boxes}.$

Sub-adult mussel holding raceway

Sub-adult fat mucket, Lampsilis siliquoidea, in raceway.

Floating basket

Sub-adult fat mucket, $Lampsilis\ siliquoidea$, from floating basket.

Creekside system

 $Sub-adult\ white\ heel splitter,\ \textit{Lasmigona\ complanata},\ from\ creek side\ system.$

Sub-adult fat mucket, $Lampsilis\ siliquoidea$, with Hallprint and PIT tags.

 $Sub-adult\ fat\ mucket, \textit{Lampsilis\ siliquoidea},\ tagged\ with\ glitter.$
