

Parts of a Horse, of Course

A horse's conformation refers to its overall shape and how the animal is put together from head to hoof. Conformation can affect how a horse walks, trots and gallops — and even its athletic ability! How many of the horse's body parts can you identify below?

**abdomen · back · cannon bone (front) · cheek · coronet · crest · croup · dock · ear · elbow · eye · fetlock · forearm
forehead · forelock · gaskin · heel · hip · hock · hoof · knee · lip · loin · mane · muzzle · neck · nostril · pastern · poll
shoulder · stifle · tail · withers**
