

ICY NATURE ART

Collect signs of nature from your backyard, and use them to make some wintry art that sparkles in the sun!

You'll Need

small bowl
piece of twine or natural jute
assortment of small twigs, seeds, berries, leaves, etc. from your yard
water

Directions

1. Place one end of the twine or jute inside the bowl along the bottom so it stretches from one side to the other.
2. Arrange your assortment of twigs, seeds, etc. over and around the twine.
3. Fill the bowl with enough water to cover your items.
4. Place the bowl in the freezer (or outside if it's below freezing).
5. Once the water freezes, pour warm water over the bottom of the bowl so the ice slides out.
6. Tie the free end of twine into a loop, and hang the piece outside on a branch, preferably one that will get some sun so you can enjoy the sparkly show!
