

Bass in the Class

Liven up your classroom with this hands-on aquatic program — one of our most wildly popular programs with teachers and students alike. Thrill your students with first-hand experiences of life cycles, food chains, ecosystems and animal behavior.

Join our free training session for fish-related facts from Forest Preserve District naturalists who will guide you through the details of this exciting eight-week program and provide you with all the information you'll need to succeed.

To participate in this program, which typically takes place in classrooms in the fall, all new teachers must first attend the annual training session. Space is limited, so register today!
